Subject: Follow-up on UIC Aquifer Exemption

George,

Good talking with you again...and I agree -- we'll probably be in contact on a more frequent basis in the days ahead, now that I'm with the BLM.

I'll give Jerry a call at DOGGR and see if he might have a copy of the map for the exempted aquifer. Like you pointed out -- the described depths for this system seem well below the commonly accepted base of fresh water.

All my best...

Greg
